

### **Remarks**

All previous grounds for rejection have been obviated by the claim amendments contained herein. 37 CFR 1.111 requires that the basis for amendments to the claims be pointed out after consideration of the references cited or the objections made. The Assignee notes that this requirement is not relevant to the instant application because, as detailed previously, there are no references or objections to avoid. Having said that, the Assignee notes that the primary reasons the prior set of claims were amended to put the claims in final form for allowance and issue. It should be noted that the independent claims may be viewed as being similar to those in U.S. Patent 7,747,339.

### **Request for Correction**

In accordance with the relevant statutes and precedents the Assignee is entitled to expect and receive: an unbiased patent application examination conducted by an Examiner with knowledge of the relevant arts who follows the law. To date, the activity associated with the instant patent application bears no resemblance to the patent application examination standards dictated by statute and precedent. Among other things this has resulted in the allowance and issue of dozens of apparently invalid patents. Prompt correction is requested.

### **Reservation of rights**

The Assignee hereby explicitly reserves the right to present the previously modified and/or canceled claims for re-examination in their original format. The cancellation or modification of pending claims to put the instant application in a final form for allowance and issue is not to be construed as a surrender of subject matters covered by the original claims before their cancellation or modification.

### **Conclusion**

The pending claims are of a form and scope for allowance. Prompt notification thereof is respectfully requested.

Respectfully submitted,  
Asset Trust, Inc.
